Frequently Asked Questions

1. How do I order?

It is simple - (a) Choose your favourite design (b) Choose your sheeting (c) Choose the perfect ribbon, trim or stitch colour (d) then email us your ideas

2. Percale or Sateen?

If you're wondering about percale or sateen, we would describe it like this – percale is a tighter weave of cotton often used in hotels and it feels cooler on the skin. Sateen is blissfully soft but not silky. It softens more with time and is used by our interior designers all over the world.

3. What are the Sheeting Thread Count options?

- ♦ Sateen - Choose from white, ivory, soft grey and natural in 400, 600, 800 and 1000 threads/sq.inch.
- ♦ Percale - Choose from white, ivory, taupe, ecru, sand and light grey in 200 and 400 threads/sq.inch.
- ♦ Organic - Choose from white in 600 threads/sq.inch.

4. Care Instructions:

- ♦ **Bed Linen:** We recommend a 40°C wash which contains purely cotton bed linen – we do not advise washing with towels or blankets. Your bed linen can be tumble dried on a low heat, and then ironed using the 'Cotton' setting. Ironing whilst the bed linen is still a little damp helps a great deal in reducing any stubborn creases.
- ♦ **Bedding:** For hygiene, we recommend using cotton pillow and mattress protectors. Our range of protectors are pure cotton and can also be easily washed in the machine. Most of our pillows and duvets can be machine washed but some require dry cleaning.
- ♦ **Table Linen:** We recommend a 40°C wash for all of our pure cotton table linen and tumble drying on a low heat. Linen can also be washed at this temperature. Please avoid detergents with optical brighteners if you have a coloured trim, as over time, the brighteners will start to fade the colour.
- ♦ **Towels:** We recommend a 40°C wash for all of our pure cotton towels and tumble drying on a low heat. Please avoid detergents with optical brighteners if you have a coloured towel or a coloured trim as over time, the brighteners will start to fade the colour.
